

AT THE END OF THIS PITCH

We are going to ask you for introductions.

ACT parents. Counselors. College tutors.
Four minutes to make the case.

Smile. You invited them. Own the room.

Tutor plays detective.
Session ends.
Next week starts over.

Student stuck

Parent pays

Tutor hunts

No map

Great tutors fail when they fly blind.

Traditional tutoring

- Starts on tonight's homework
- Forty minutes finding the gap
- Progress lives in the tutor's head
- Practice is another worksheet

MindCraft

- Gap diagnosed before session one
- Tutor walks in already briefed
- Living map parents can see
- Story missions that make the click matter

WHAT WE ARE

We map the real math gap.
Then a college tutor starts
there, not page one.

Gap scan

Living notebook

TODAY'S WORK HAS A REASON

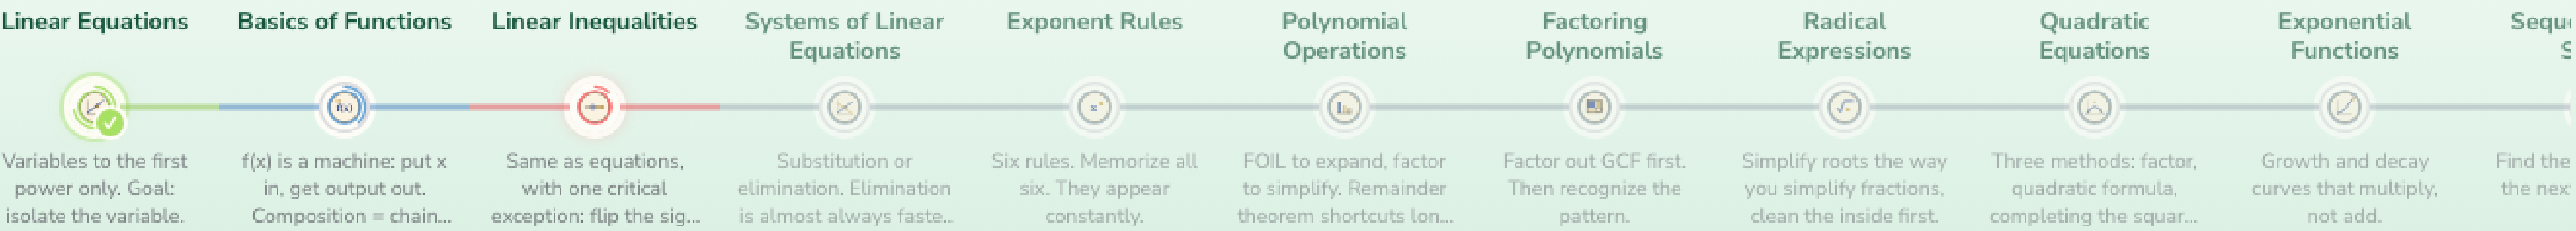

Warm-ups

The fluency you lean on when everything else gets noisy.

Algebra

Equations, functions, and the moves that unlock most ACT items.

Geometry

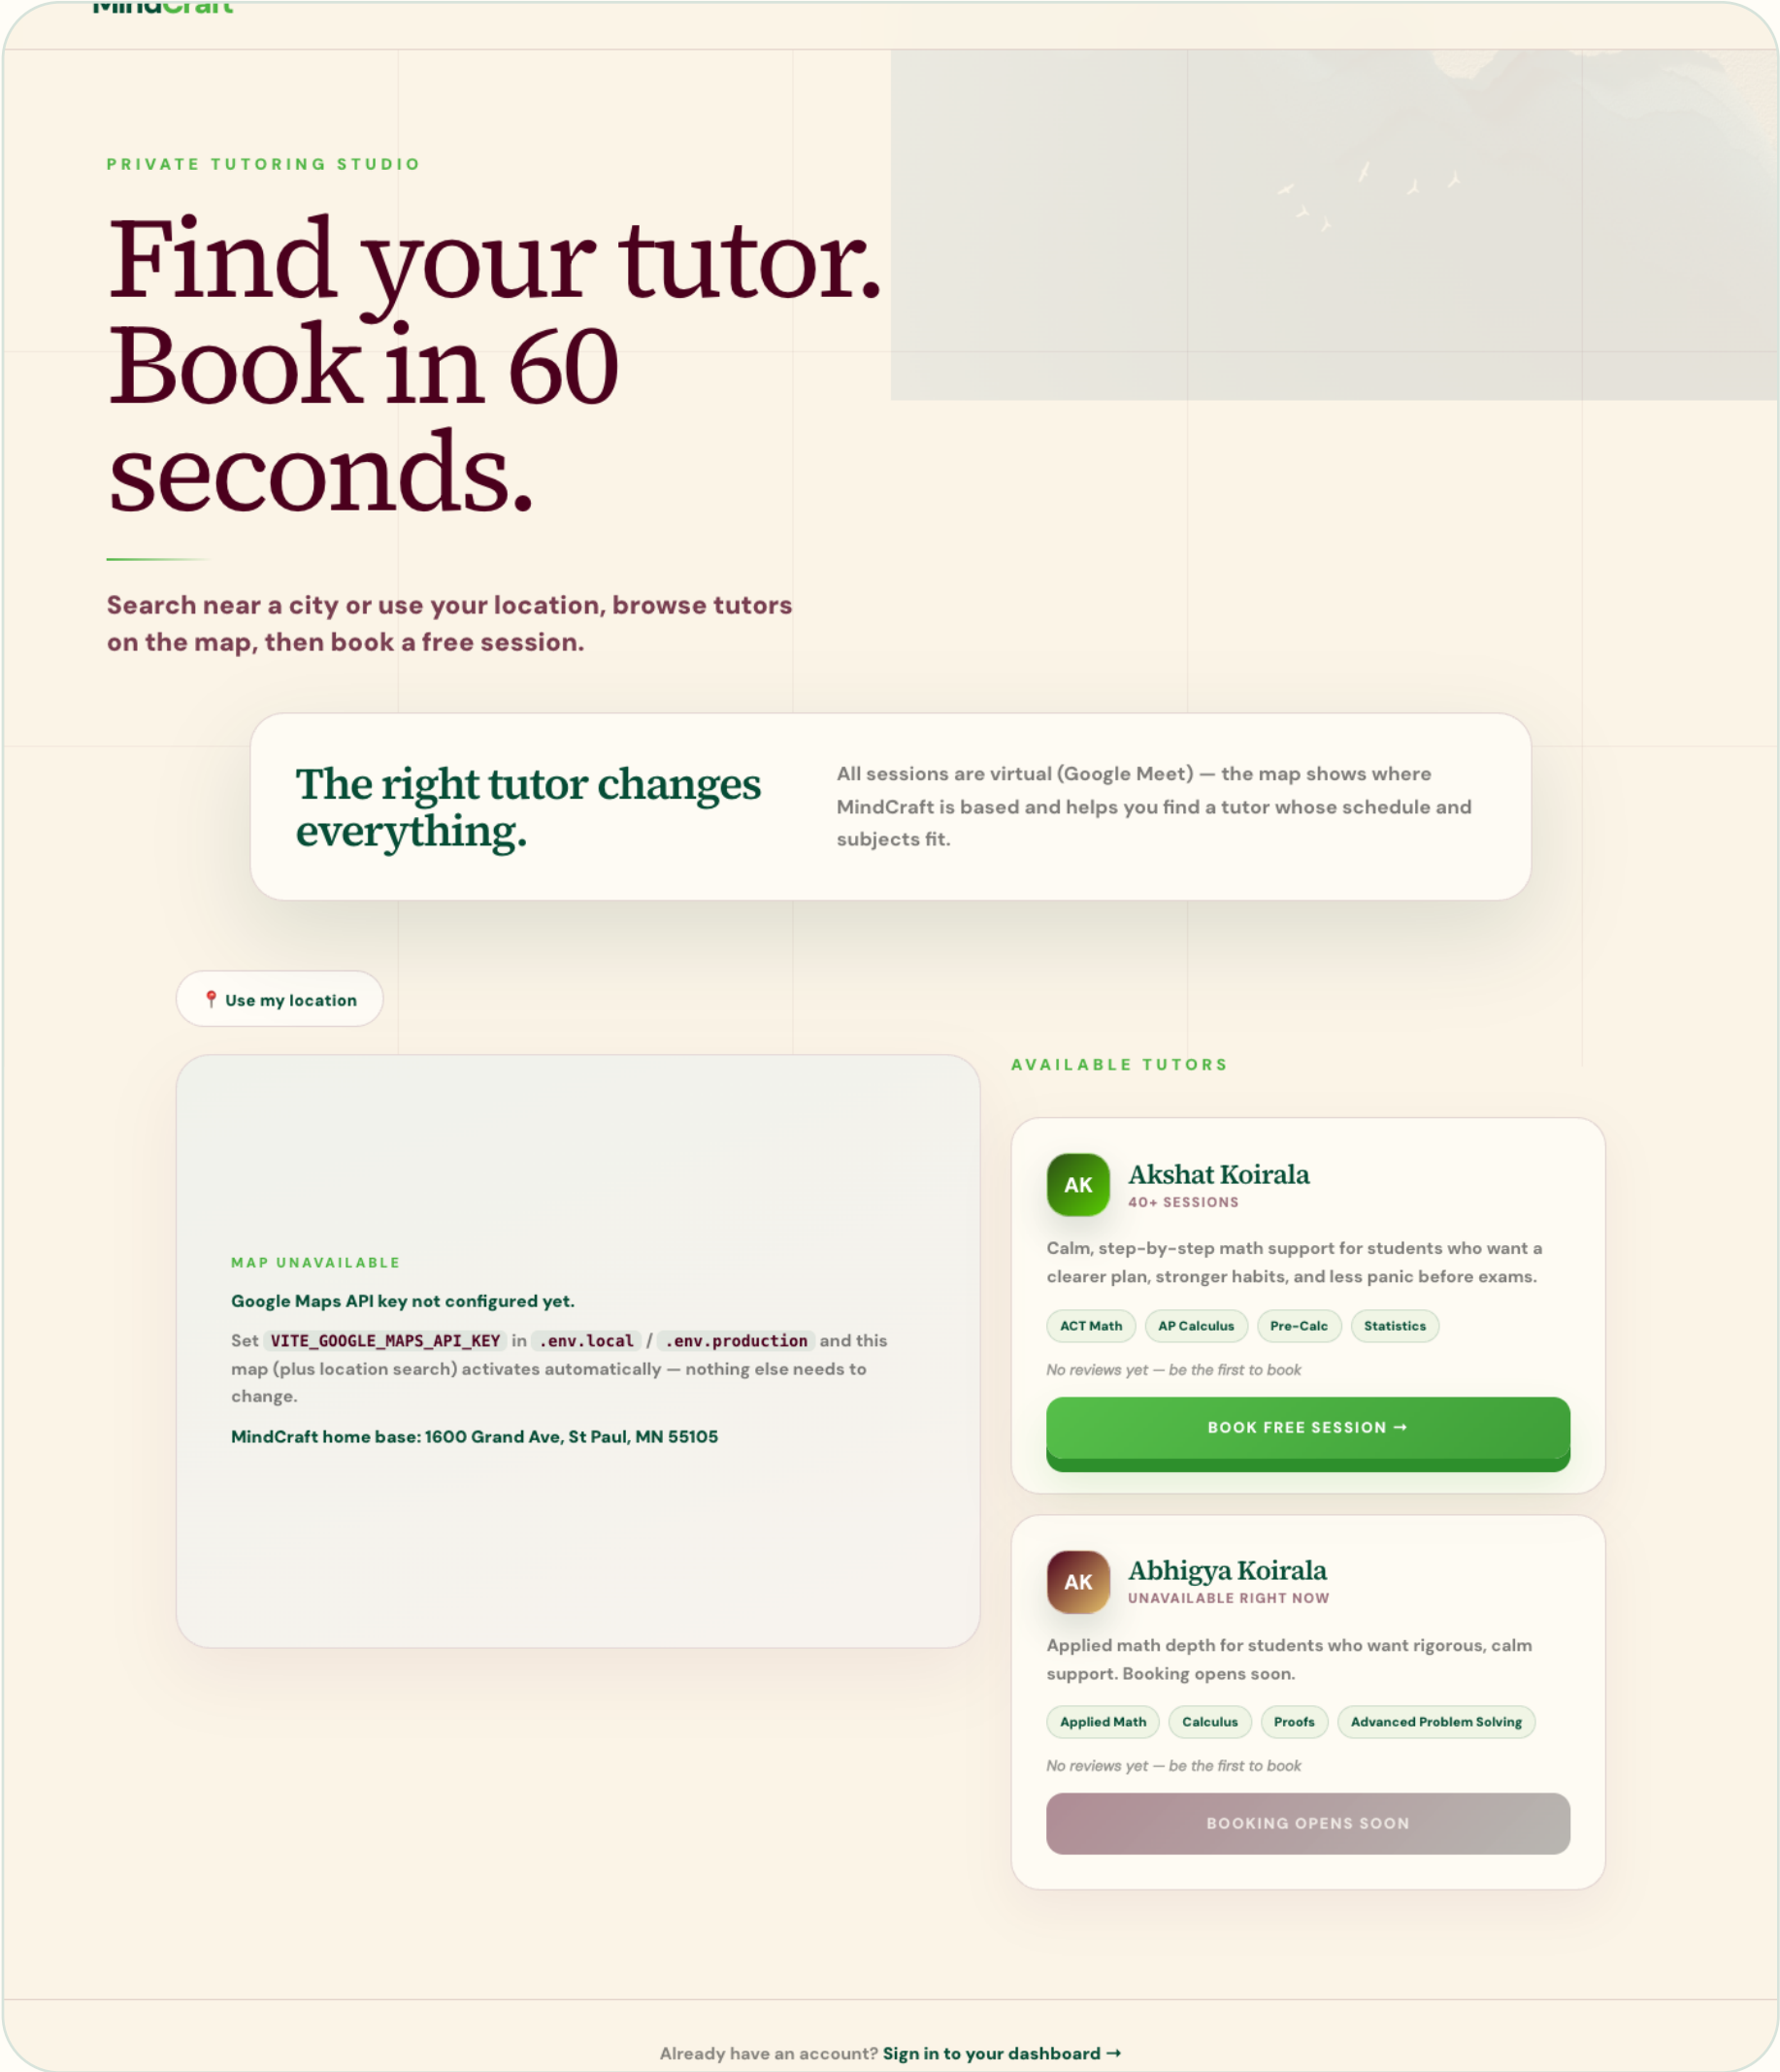

Shapes, angles, and space: draw it, then name it.

Story missions + college tutors

STAKES, THEN A HUMAN

WHY US

Big picture. Allen wrench.

AKSHAT · BIG PICTURE

Why the student gave up

Eight years watching the broken hour.

BLAKE · ALLEN WRENCH

Why the engine knows

Builds the map tutors can trust.

THE ASK

Who should we talk to?

- 01 Parent with a 10th–12th grader on ACT Math
- 02 Counselor who hears “not a math person”
- 03 College tutor tired of detective hours
