

MindCraft

Public Conversation Kit

Field discovery for a college town · listening desk, not a pitch
Built from research doctrine (Appendix B · SAFE-WTP · SAFE-PDASH ·
SAFE-TUTORGRAIN)
plus your BETA Math Help Snapshot / Pulse showcase card

Opener (say out loud):

“I’m building a math map that shows the exact gaps kids get stuck on — not another homework app. Got 90 seconds for a raffle card? No pitch. Or eight minutes if you’ve got a story.”

Badge line: MindCraft listening desk · math gaps research · raffle · no pitch

August 2026 · Internal field pack

Why this kit exists

The research lab still needs **10 Maya + 10 parent interviews**. Your BETA showcase card already worked in public. This pack upgrades it for cafés, student unions, parents' weekend, and tutoring centers — without clipboard energy and without breaking doctrine (no Likert WTP, buyer ≠ user).

Never lead with: AI, streaks, guaranteed ACT points, “identity transformation,” or “how much would you pay?”

Four roles you'll meet (college town)

Role	Why gold	Route
Parent / guardian	Buyer	Card → 8-min → book 25-min
High-school student (Maya)	User	Card → 8-min → Appendix B
College tutor / ed major	Near-peer supply	Tutor grain card
Teacher / coach / advisor	Trust + distribution	Teacher card

Tag every note: role · town · date · length (90s / 8m / 25m) · contact Y/N

Tier A — 90-second public card

Reuse your showcase **Math Help Snapshot** front. Keep: role · grade · past help · when hard what happens · what matters · urgency · optional contact.

Add one write-in:

“In one phrase: what does ‘good math help’ look like in two weeks?”

Raffle honesty: contact is for raffle / optional follow-up. Answers can stay anonymous. Label dataset **showcase_or_street_card** — not “50 discovery calls.”

Tier B — 8-minute street / coffee chat

Use when they finish the card and say they have a minute. Ask: “Can I keep notes so I don’t butcher your words?”

Shared warm-up (all roles, 60s)

- “What’s your connection to high-school math right now?”
- “Who actually feels the pain day to day — and who would pay if something worked?”

B1 — Parent / guardian (buyer)

Job: cancel triggers, proof they trust, what “relief” means — not a price number.

- “Walk me through the last time math stressed the house. What happened that night?”
- “What have you already tried (tutor, app, YouTube, teacher)? What failed — specifically?”
- “If something worked for two weeks, what would you see that made you trust it?”
- “What would make you cancel or ghost a math program after a month?”

Choice, not Likert (SAFE-WTP):

“If you had to pick one — (A) exact gap map + short weekly parent note with ‘what’s due to return,’ or (B) unlimited AI chat that answers homework, or (C) more human tutor hours with no map — which, and why?”

You can say none."

- Close: "Want a 20-minute follow-up when we have a parent preview?"

Ban: "How much would you pay?" / guaranteed points / live wrong-answer feed.

B2 — Student / Maya (user)

Job: when math feels dangerous vs when competence felt real. (Appendix B compressed)

- "Tell me about a time math felt dangerous or humiliating."
- "What did your body do? What did you do next?"
- "Tell me about a time you surprised yourself in math. Did anyone see it?"
- "When you're stuck, do you want comfort, a hint, or the answer — in what order?"
- "If an app celebrated you, would that feel real or fake? Why?"
- "What would make you take a harder math class next year?"
- Close: optional full Appendix B (15–25 min).

B3 — College tutor / ed major (near-peer)

- "Who do you tutor, and what do they struggle with — concept, format, or panic?"
- "When a student says 'I get it,' how often is that real vs polite?"
- "What would you want on a one-page brief before a session?"
- "Parents vs students: who do you feel accountable to, and what do they ask for?"
- Choice: better tutor = (A) credentials (B) diagnosis map (C) warmer vibe — rank 1–2–3.
- Close: "Open to a paid pilot session later this term?"

B4 — Teacher / advisor / coach

- "Where do kids lose the thread — missing old skills, word problems, test transfer?"
- "What do parents ask you for that you can't give at scale?"
- "What would a useful outside tool show in one screen — without becoming another gradebook?"
- "Hard no: what would make you refuse to recommend something to families?"

Tier C — 25-minute scheduled interview (real n=10)

Cards and 8-min chats are recruitment. Tier C fills the Constitution queue (10 Maya + 10 parents).

C1 — Full Maya (Appendix B + add-ons)

Run Appendix B 1–7, then:

- “When practice feels like training vs attack — what was different?”
- “Have you ever known a topic on homework but missed it when the question looked different?”

C2 — Full parent

- What did you think you bought last time you paid for math help?
- What would make you cancel?
- Show three update styles: (A) tonight % / streak · (B) “Last proved 12 days ago · return due · one mission” · (C) classmate rank heatmap — which builds trust / feels like surveillance / you’d pay to keep?
- Cheap-talk: pilot at a real monthly fee for diagnosis + weekly honest note + limited human minutes — (a) waitlist (b) free month first (c) not interested?
- Structural check: time, devices, quiet space, money stress — anything that kills “just practice more”?

C3 — Tutor grain deep dive

Expand B3 with pour vs prompt, wait time, what “quality held for a semester” means.

College-town weekly plan

Week goal	Volume
Snapshot cards	15–25
8-min chats (mix roles)	5–8
Tier C booked	2–3 (toward 10+10)

Where: student union · education building · coffee near campus · parents’ weekend · college-fair tables · tutoring center (ask permission).

Follow-up text:

Thanks again — you said [their phrase]. We’re interviewing 10 parents and 10 students this month. Free 20 min, no pitch. Two slots: [day] or [day]. Want one?

What you write down (one row)

date · place · role · tier · grade_or_context · hard_moments · must_haves · urgency · buyer_user_split · choice_A_B_C_or_none · cancel_trigger · dangerous_moment · fake_praise · quote · contact · follow_up_booked

Doctrine tags: exact_gaps · trusted_human · parent_relief · transfer_fail · format_fail · shutdown · proof_not_streak · near_peer

Hard bans (before every shift)

- × No “How much would you pay?” → use choice or waitlist.
- × No “We’ll raise ACT by N points.”

- × No emotion AI / live stalk / Family Leaderboard sell.
- × Street cards ≠ “interviews completed” toward the 10+10.
- × No pitching the Map until Tier C close — listening first.

Print checklist (tonight)

- ☐ 40× Snapshot front (+ Pulse back optional)
- ☐ 1× stand sign with opener line
- ☐ This kit on phone (or laminated role cards)
- ☐ Notes sheet / Notion with columns above
- ☐ Raffle prize (honest, small)
- ☐ Calendar link for Tier C

If they ask what you build (after listening):

“We find the exact gap, prove it with practice that transfers, and give parents an honest note — not another green streak.”

Pocket role cards (print · laminate)

Opener: “Math gap map research — 90s raffle card, no pitch. Or 8 minutes if you’ve got a story.”

PARENT (8 min)

1. Last house-stress math night — what happened?
2. Tried already — what failed, specifically?
3. Two weeks worked — what would you see?
4. What makes you cancel after a month?
5. Pick one or none: (A) gap map + honest weekly note (B) unlimited AI homework chat (C) more tutor hours, no map — why?
6. Book 20-min parent interview?

BAN: how much would you pay / ACT points / live stalk

STUDENT / MAYA (8 min)

1. Time math felt dangerous or humiliating.
2. Body? Next move?
3. Time you surprised yourself — did anyone see?
4. Stuck: comfort → hint → answer order?
5. App celebration: real or fake?
6. What would make you take harder math next year?
7. Book full 20-min chat?

COLLEGE TUTOR / ED MAJOR (8 min)

1. Who you tutor — concept, format, or panic?
2. “I get it” — real or polite?
3. Ideal one-page pre-session brief?
4. Accountable to parent or student — what they ask?
5. Rank: credentials / diagnosis map / warm vibe.
6. Paid pilot later this term?

TEACHER / ADVISOR (8 min)

1. Where kids lose the thread?
2. What parents ask that you can’t scale?
3. One-screen useful outside tool (not a gradebook)?
4. Hard no — what you refuse to recommend?

After each person: role · place · date · 90s/8m/25m · one quote · contact Y/N · follow-up booked
