

Tartaglia's arsenal quiz

Fun story-first carousel with a real stake, comment bait, and a polynomial click.

Why this story (not “a gunner asking about cannons”): Gunners already think they know. The stake is the Republic’s arsenal. Short shots waste iron. Old masters answer with instinct. Tartaglia’s click is writing the flight as stacked pieces: polynomial thinking. Canon lives in MindCraft’s Polynomial Operations chapter.

1 · Hook

2 · Guess

3 · Reveal

SLIDE 1 · HOOK

Arsenal stake first. Captains vs Tartaglia. Then the question.

SLIDE 2 · GUESS

You advise the arsenal. Comment bait. D is the instinct trap.

MindCraft

PICK ONE. NO CALCULATOR.

What do you tell
the arsenal?

A 30° · skim the water, stay fast

B 45° · balance height and run

C 60° · loft it, pride of the sky

D Whatever feels right. Instinct.

Comment your letter. Reveal next →

SLIDE 3 · REVEAL

45° + write the curve as stacked pieces = polynomial click.

MindCraft

THE CLICK

B · 45°

when the path is a parabola
you can write down.

TARTAGLIA'S MOVE

Don't guess the angle.
Hold the curve as stacked pieces.
That is polynomial thinking.

MindCraft puts ACT questions
inside the story. Then the map moves.

INSTAGRAM CAPTION · COPY / PASTE

Venice arsenal, 1537.

Every short shot wastes iron, powder, and pride. Captains swear by gut. Tartaglia asks for a curve.

At what angle does a cannon throw a ball the farthest?

- A) 30° · skim the water, stay fast
- B) 45° · balance height and run
- C) 60° · loft it, pride of the sky
- D) Whatever feels right. Instinct.

Drop your letter before you swipe.

(The answer is not a vibe. It is a path you can write.)

MindCraft puts ACT math inside stories like this. Tartaglia, the arsenal, the stacked pieces of a curve. Then asks the question while the world is still open.

Story first. Questions second. Map moves.

PIN THIS AS FIRST COMMENT

Reveal: $B \cdot 45^\circ$. If air is calm and the path is a parabola.

Don't guess the angle. Hold the curve as stacked pieces. That is polynomial thinking. Same move on your ACT.
